AWMS Data Importing

ONE Line of Text Importing Instructions:

- 1) Isolate data into it's own file/spreadsheet in a single column. File should hold only data for wire marking. No other information on the spreadsheet, such as headings or column name.
- 2) Save this file as file type: Text (OS/2 or MS-DOS). This is accomplished by using the drop down arrow in the "save as type" box, below file name.
- 3) Save all import files in a hard drive folder. Example: c:\import
- 4) Close file, confirm with operating system that the file is saved in the appropriate format: Text (OS/2 or MS-DOS).
- 5) To Import: go to "Import Data into Marker File" Option on AWMS menu.
- 6) Select "Straight ASCII", 1st option.
- 7) Select file to import from your c: drive directory.
- 8) Choose your product code, point size, lines, etc.
- 9) Select "Accept", job complete

TWO Lines of Text Importing Instructions:

- 1) Isolate data into it's own file/spreadsheet so column "A" is first line of text on each marker and column "B" is second line, etc. File should hold only data for wire marking. No other information on the spreadsheet, such as headings or column name.
- 2) Save this file as file type: CSV (Comma Delimited). This is accomplished by using the drop down arrow in the "save as type" box, below file name.
- 3) Save all import files in a hard drive folder. Example: c:/import
- 4) Close file, confirm with operating system that the file is saved in the appropriate format: CSV (Comma Delimited).
- 5) To Import: go to "Import Data into Marker File" option on AWMS menu.
- 6) Select "Comma Delimited", 2nd option.
- 7) Select file to import from your c: drive directory.
- 8) Choose your product code, point size, lines, etc.
- 9) Select "Accept", job complete.
